

Skimmer Boxes

All Waterco Skimmer Boxes are manufactured using the highest quality, impact resistant thermoplastic (ABS plastic). All Waterco Skimmers come enhanced with a wide weir door and suction support cover designed to resist any suction blockages on start-up.

SupaSkimmer

The SupaSkimmer is a large capacity skimmer box which is ideal for use in large domestic, semi commercial and commercial swimming pools. Because of its large capacity 5.9 litre debris collection it is also ideal for any swimming pool that is constructed in leafy environments.

Features include:

- Lock down leaf basket and vacuum plate - holds the leaf basket and vacuum plate firm
- Large capacity basket – 5.9 litres, over double the size of conventional skimmers
- 2 x 50mm bottom suction ports – less water flow restrictions
- 2 x 40mm side ports – ideal for wall mount cleaners
- New child resistant safety lid – prevents child accidents
- Deeper body style – less chance of running pumping equipment dry.
- Built in overflow drain port to assist the prevention of flooding, during heavy rain.

SupaSkimmer Widemouth

SupaSkimmer
*Concrete model shown

Model	Maximum Surface Area	Suction Port (mm)	Opening (mm)	Basket Capacity (litres)	Total Height (mm)	Total Depth (mm)	Unit Weight (kg)
Supaskimmer	75 m ²	2x50	247x152	5.9	580	500	7
Supaskimmer Widemouth	75 m ²	2x50	551x152	5.9	580	500	10

S75 Skimmer Box

The S75 skimmer is a general purpose skimmer which can be used in concrete, fibreglass and above ground pool installations. It has a built in overflow drain port to assist the prevention of flooding, during heavy rain. A horizontal 50mm suction take-off reduces the suction lift demands on the pump, saving energy.

Features include:

- Lock down leaf basket and vacuum plate - holds the leaf basket and vacuum plate firm
- Child safety lid lock down system – prevents child accidents
- Square and round deck lid configuration

Model	Maximum Surface Area	Suction Port (mm)	Opening (mm)	Basket Capacity (litres)	Total Height (mm)	Total Depth (mm)	Unit Weight (kg)
S75	75 m ²	50	247x152	2.4	520	440	6

SP5000 Skimmer Box

The SP 5000 skimmer is a general purpose skimmer which can be used in concrete, fibreglass and above ground pool installations. The SP5000 is sized to minimise excavation and reduce concrete and steel requirements, whilst maintaining an optimum skimming action. A horizontal 50mm suction take-off reduces the suction lift demands on the pump, saving energy.

Model	Maximum Surface Area	Suction Port (mm)	Opening (mm)	Basket Capacity (litres)	Total Height (mm)	Total Depth (mm)	Unit Weight (kg)
SP5000	75 m ²	50mm	255x155	2.6	478.2	385	5

Skimmer Box Extension Ring

If the unit is to be installed so that the deck lid will not be secured to the skimmer body, Waterco recommends using a skimmer Extension Ring (Prod No. 624105) for trouble free installation. Using the Extension Ring will prevent misalignment of the Deck Ring and the skimmer body. This will eliminate problems caused by concrete intruding into the skimmer box cavity. The Extension Ring will ensure there are no problems inserting/removing vacuum plates or other similar devices. The Waterco Extension Ring suits the Waterco Supaskimmer and the S75 MKII skimmer boxes as well as the Automatic Leveller MKII. An individual Extension Ring offers an extension of 60mm and can be piggybacked to give an extension of any multiple of 60.

The Extension Ring sits snugly on top of the skimmer box between the skimmer box body and the Deck Ring and is strong enough to hold its shape during concreting. The Deck Ring also can be secured to the Extension Ring if required.
